

## Cloud Solution Architect

**Location:** Greater Toronto Area

**Direct Hire**

### The Job:

As a Cloud Solutions Architect, you will use cloud and technical architecture expertise to help our business solve challenging problems through innovative technology solutions. Work on exciting projects, future-proof your skills, and grow into your dream job alongside some of the most talented, knowledgeable, and dedicated technologists in the industry.

### Responsibilities:

- Define innovative solutions using concepts such as infrastructure-as-code, deployment orchestration, and automation templates
- Implement PaaS and IaaS solutions in a public cloud platform such as Azure
- Use expert level knowledge of identity and access management in on-premises solutions and the cloud inclusive of Azure AD Connect, ADFS, and third-party identity providers
- Remain abreast of regulatory and compliance requirements in order to drive successful governance strategies

### Skills Required:

- Minimum of eight years of professional experience in infrastructure
- Ability to lead the design and implementation of PaaS services, constructs and deployment methods including Database-as-a-Service, App Services, storage and automation
- Enterprise-scale technical experience with cloud security, hybrid infrastructures secure, architecture designs, and technology management
- Must have experience in a client-facing environment and interacting with technical and business stakeholders
- Proven expertise in the implementation of encryption technologies (SSL, encryption, PKI)
- Passionate about emerging technology, want to pursue certifications, and the desire to further your cloud career

### Experience:

- Post-secondary education in Information Technology, Information System Technician, Business Administration, Computer Science or related field with 3-5 years of experience in a similar role.
- Preference will be given to candidates with solid expertise in Azure.
- Experience with VMware
- Experience following ITSM processes & procedures
- Experience using Jira considered a huge asset.
- Experience with Ansible Tower and/or Nginx considered a huge asset.
