

IT Manager

Location: remote (travel to Arlington, TX may be required post-COVID)

Direct Hire

The Business:

Constellation Dealership Software companies, Ideal, c-Systems and Charter, have developed the largest database of dealership transactional sales, inventory position and task completion information in the outdoor power equipment (OPE) market. Drawing from over 1,500 dealers on a nightly basis, this data warehouse is the largest, most accurate source for dealership and market year-over-year trending information in the industry.

Position Summary:

Our products allow dealers to better manage their dealerships and be more profitable. We are looking for an IT Manager to lead a team of CloudOps Engineers in their delivery of IaaS, PaaS, and SaaS offerings to internal stakeholders and external customers. Previous experience with Azure migrations is mandatory. Previous leadership experience is mandatory.

Skills Required:

- 5+ years of leadership/management experience of IT Engineers
- 3+ years' experience operating and maintaining systems running in Microsoft Azure
- 5+ years' experience managing standard data center technologies including compute, storage (Nimble/NetApp), networking (switching/routing/firewall), and VMware technologies.
- 2+ years' hands on experience in infrastructure automation via tools utilizing coding languages such as JSON, YAML, or Python
- Knowledge of scripting languages (JSON, YAML, PS, Python) to automate cloud infrastructure tasks. Preferred experience with tools like Ansible, Chef, or Puppet.
- Strong quantitative and analytical skills, including ability to conduct outside/inside research, analyze data, and use tools to develop models and drive analyses
- Experience working with offshore teams
- Experience working on multiple concurrent projects
- Excellent problem-solving skills
- Independent and self-driven
