Full Stack Developer

Location: remote North America
Direct Hire

The Job
As a Full Stack Developer your responsibility is to design and develop applications, APIs, integrations, and services that powers various web and mobile applications.

Responsibilities include:
- Design and develop applications with a focus on performance and usability through fast, timeboxed experiments.
- Design and provide guidance on building end-to-end systems optimized for speed and scale.
- Work across the full stack, building highly scalable distributed solutions that enable positive user experiences and measurable business growth.
- Ensure application performance, uptime, and scale, maintaining high standards for code quality and application design.
- Work within agile development methodologies, adhering to best practices and pursuing continued learning opportunities.
- Execute on department-level goals, specifically focusing on user adoption and issue resolution.
- Provide design and code reviews for other developers.
- Work closely with Product Owners to understand the requirements and solve issues.
- Focus on security, Performance, and scalability of the platform.

Experience/Skills include:
- Expertise in Software Development methodologies and tools
- Experience developing windows, web and mobile.
